INTRODUCTION

1986 YEAR END

STATISTICAL REPORT ANALYSIS

INTRODUCTION

This is the second year that the Department of Prisons has prepared a year end statistical report. This 1986 report presents a great variety of population reports and demographics. New this year are several reports which deal with inmate characteristics such as educational level, alcohol abuse, and the frequency of prior felony convictions.

Much of the information contained in this report has been obtained from the Department's automated offender based information system, which began development in early 1984. Admission records and initial classification instruments are coded at the intake units and reported to the data base manager. These documents form the basis for the inmates first records in the system. Thereafter, reclassification instruments, routinely coded at the institutions and facilities, are reported to the data base manager and included in the system. Upon release from prison a release instrument is coded and entered in the system.

During the year the system is used to produce a variety of management reports and special interest reports. Typically

these reports include: custody distribution, frequency of specific crimes, objective classification scores, the frequency of custody deviation from the computed score, and admission demographics.

The reports which detail the size of the population and the growth of the population are mostly hand generated with some support from a micro computer. These same population reports are typically presented in two ways: by actual numbers and by average numbers. This serves the needs of most users.

Prepared by the Classification and Planning Division
Robin Bates, Chief of Classification and Planning
Glen Whorton, Classification and Planning Specialist
Beverly Merideth, Statistician

*Critical operating capacity is defined as "the maximum population level, above design capacity, at which an institution may operate for extended periods of time without unnecessary jeopardy to security and safety. Critical operating capacity is based on the structure of the institution, the staffing, and the availability of services to meet the need of the expanded population."

**Still under construction.

* Prior felony conviction is defined as each instance in which an offender is found guilty of a felony crime, as an adult, regardless of whether the offender was sentenced to prison or probation. Felony convictions for which the offender is presently serving a sentence are not included in the frequency count.

ESCAPES

STATE OF NEVADA
DEPARTMENT OF PRISONS
ESCAPE COMPARISON
JAN - DEC 1986

This data is arranged in order of performance; worst performance first and best performance last. Population represents the average daily population for the state for 1985. Escape ratio represents the relationship between the population and the number of escapes; i.e., Colorado had one for every 18.0 inmates escape.

STATE	POPULATION	ESCAPES	ESCAPE RATIO
COLORADO	3658	204	1 PER 18.0
WASHINGTON	6380	297	1 PER 21.5
OREGON	5238	196*	1 PER 26.7
MONTANA	1090	30	1 PER 36.3
CALIFORNIA	54762	955	1 PER 57.3
NEW MEXICO	2417	32	1 PER 75.5
IDAHO	1573	17	1 PER 92.5
NEVADA	4181	28	1 PER 149.3
ARIZONA	9096	50**	1 PER 181.9
WYOMING	805	4	1 PER 201.3

*Oregon conducts a program in which inmates within six months of parole are granted a community release. If the community release inmate fails to return to initiate his parole then he is considered to be on escape status. This community release program accounts for the majority of Oregon's escapes and these escapes are not reflected in Oregon's escape ratio above. The 196 escapes are all walkaways from minimum security placement.

**Arizona does not keep specific records on escapes from minimum and community trustee custodies. In 1986, Arizona suffered 50 escapes from secure institutions. Arizona could not give us an estimate for walk-aways.

INTRODUCTION

INTRODUCTION

This is the third year that the Department of Prisons has prepared a year end statistical report. The format of this report was designed with the philosophy that "more is not necessarily better". Most of the information is, therefore, presented in the form of summary graphics.

The information covers three general topic areas:

- Inmate Demographics
- Prison Census
- Data Snapshots

More detailed information on any subject area is available, upon request, from the Department of Prisons, Classification and Planning Division.

The Department employs a micro-computer based "Inmate Management Information System", to collect and manipulate all data that is relevant to the following tasks:

- Inmate Timekeeping and Record Keeping
- Inmate Classification
- Department Statistics
- Population Projections and Planning Activities

The information system is distributed throughout the Department's Central Office in Carson City, on a local area network. In the latter part of 1989 the system will be connected to and shared with all of the institutions and facilities.

Except where otherwise noted, the demographic information presented in the graphs is based on the current prison population as of January 9, 1989. The current prison population includes all inmates in Nevada institutions and facilities, as well as those who are temporarily out of the Department on the "local outcount". The local outcount includes inmates in community hospitals and those in local jails making court appearances. It does not include inmates on the "out-of-state outcount" because the Department often does not have complete demographic information on this small segment of the total inmate count. Frequently these inmates serve their entire Nevada sentence concurrently in another jurisdiction without physically entering the Nevada system.

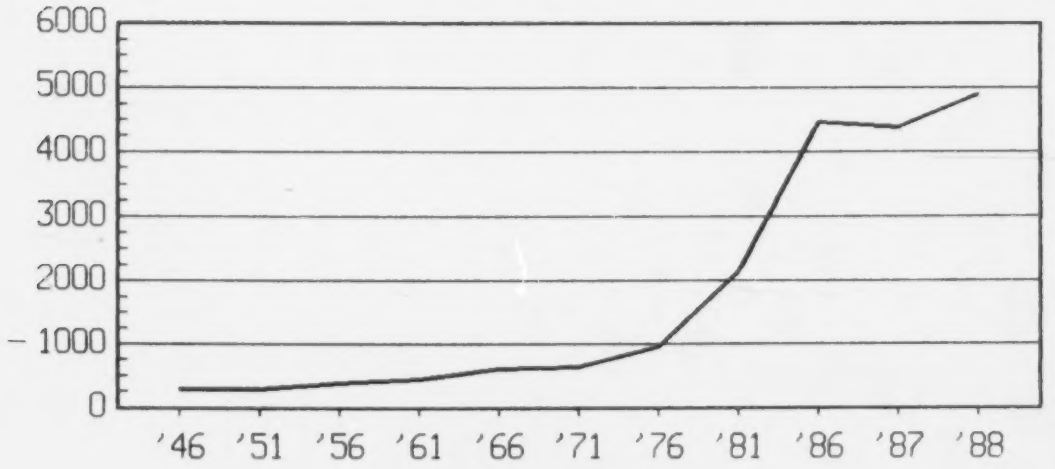
PRISON CENSUS

DEPARTMENT GROWTH
1946 THROUGH 1988



END OF THE YEAR (12/31)
PRISON POPULATION

THE POPULATION DECLINE IN 1987 WAS DUE TO A REDUCTION IN TOTAL SENTENCING AND MODIFICATION TO THE CRIMINAL STATUTES. THE EFFECT OF THE STATUTORY ADJUSTMENTS WAS DELIBERATE AND CAUSED LOW RISK INMATES TO SERVE LESS TIME IN PRISON.

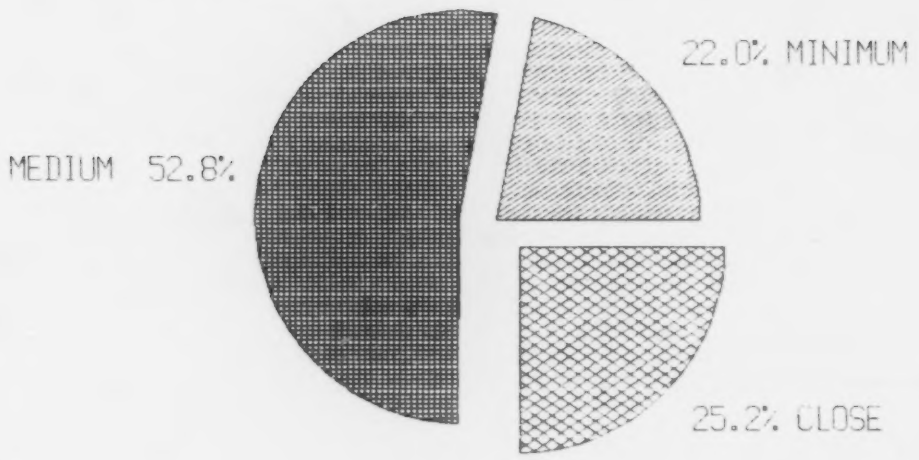
WASHINGTON	6537	403	1 PER 16.2
OREGON	4309	357	1 PER 12.1

CUSTODY DISTRIBUTION: INSTITUTIONAL POPULATION



THE DEPARTMENT'S CUSTODY DISTRIBUTION GOAL, FOR THE 90/91 BIENNIUM, IS:

MALE	FEMALE
25% MINIMUM CUSTODY	42% MINIMUM CUSTODY
56% MEDIUM CUSTODY	39% MEDIUM CUSTODY
19% CLOSE CUSTODY	19% CLOSE CUSTODY

CUSTODY DISTRIBUTION GOALS ARE ESTABLISHED THROUGH THE ANALYSIS OF THE CURRENT PRISON POPULATION, USING AN OBJECTIVE CLASSIFICATION INSTRUMENT.

NEVADA'S SYSTEM OF INMATE CLASSIFICATION IS BASED ON AN "OBJECTIVE" MODEL. A CLASSIFICATION INSTRUMENT SCORES EACH INMATE BASED UPON A SYSTEM OF WEIGHTED QUESTIONS WHICH TEND TO HAVE A PREDICTIVE VALUE IN TERMS OF INMATE RISK POTENTIAL. THE INMATE'S SCORE IS THEN INTERPRETED AS EITHER MINIMUM, MEDIUM OR CLOSE CUSTODY. THE CRITERIA FOR EACH CUSTODY IS A COMBINATION OF STATUTORY AND POLICY CONSIDERATIONS.

INMATE CHARACTERISTICS THAT ARE IMPORTANT TO THIS SYSTEM OF CLASSIFICATION ARE CONSTANTLY CHANGING. FOR THIS REASON, EACH INMATE IS RECLASSIFIED AT SIX MONTH INTERVALS, AND OFTEN MORE FREQUENTLY.

THE COST PER INMATE PER YEAR INCLUDES ALL EXPENSES EXCEPT CAPITAL IMPROVEMENTS.

In July of 1987 the Department of Prisons and the National Council on Crime and Delinquency (NCCD) entered into a contractual relationship for the purpose of preparing prison population projections. NCCD is recognized nationally as a leader in this field of technology and research. These projections were produced jointly by the Department and NCCD in June, 1988. The projections were examined in November of 1988 and re-affirmed.
